

Manual: Flappy Bird 3D Full Game uScript

Instalation:

Youtube Video Instalation: <https://youtu.be/0rFUF9qDGn8>

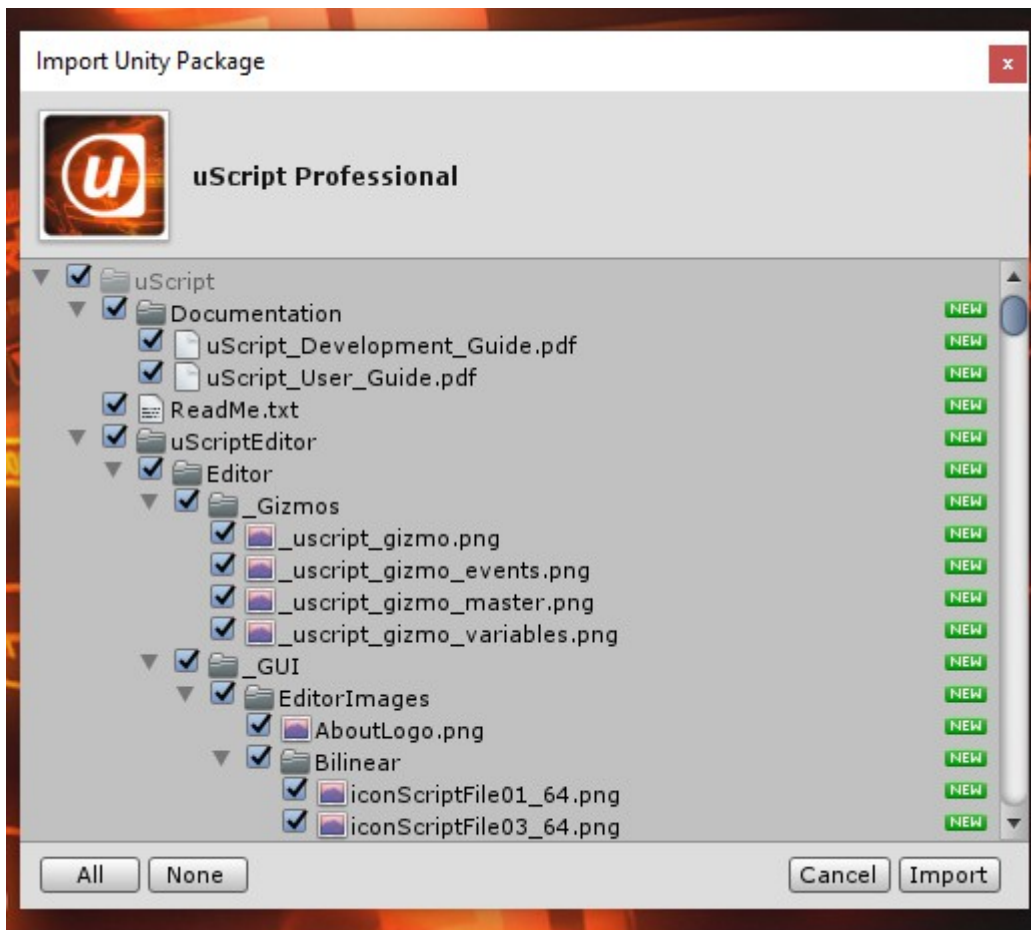

1. Create a new 3D project in Unity 2018.4 LTS

2. Import uScript (Professional or Personal)

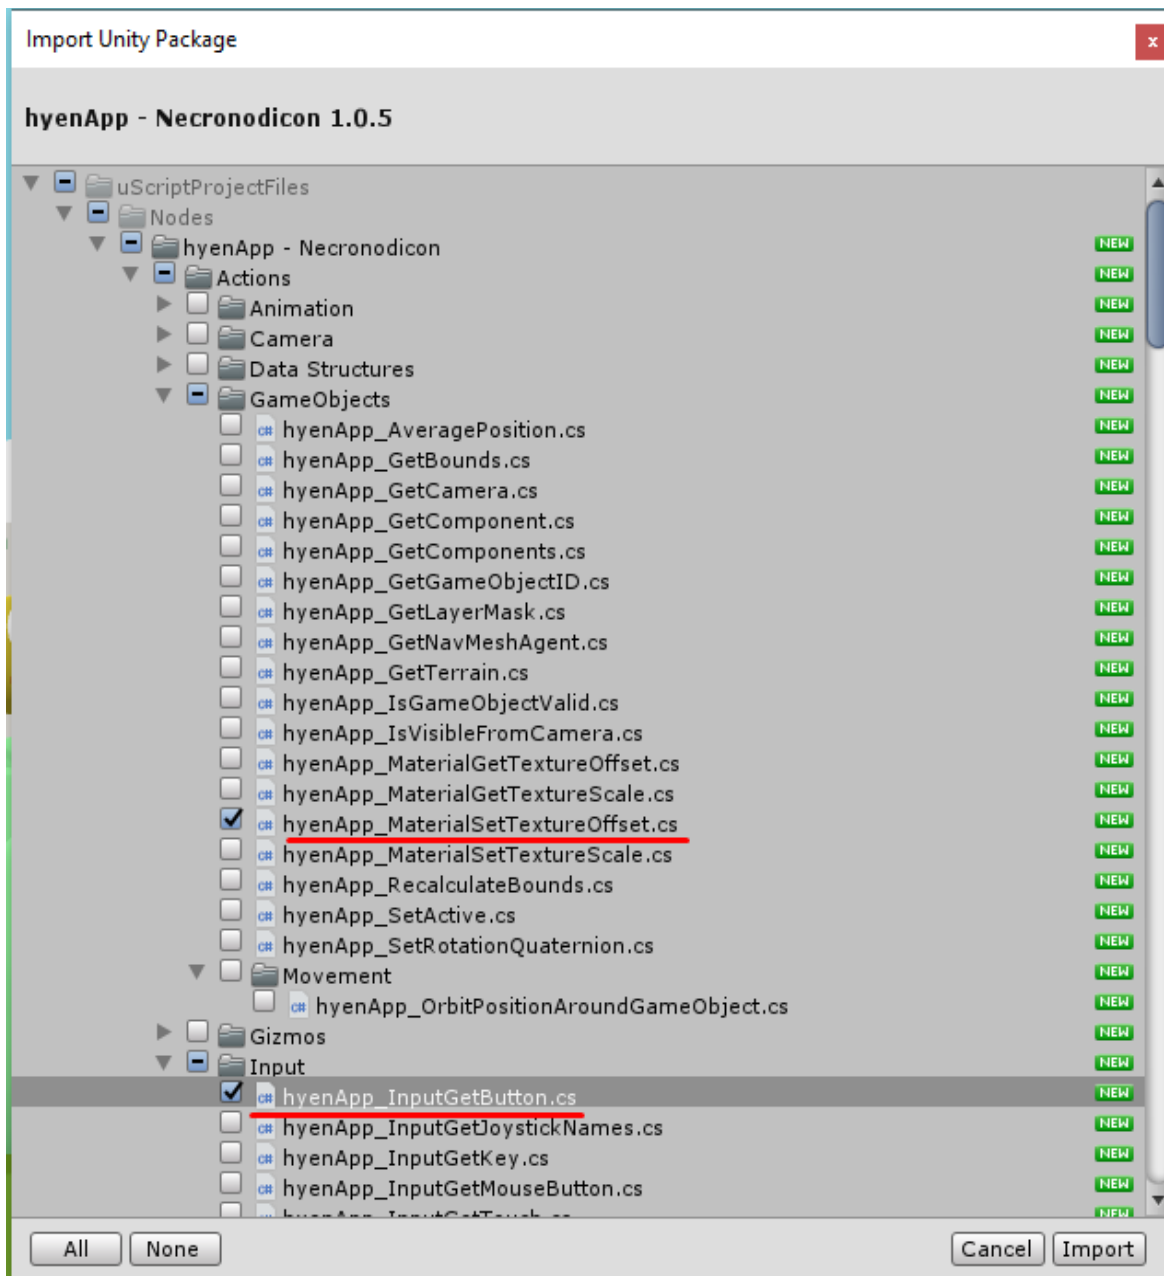

<https://assetstore.unity.com/packages/tools/visual-scripting/uscript-professional-1808>

<https://assetstore.unity.com/packages/tools/visual-scripting/uscript-personal-learning-edition-52060>

3. Import hyenApp's **Necronodicon**

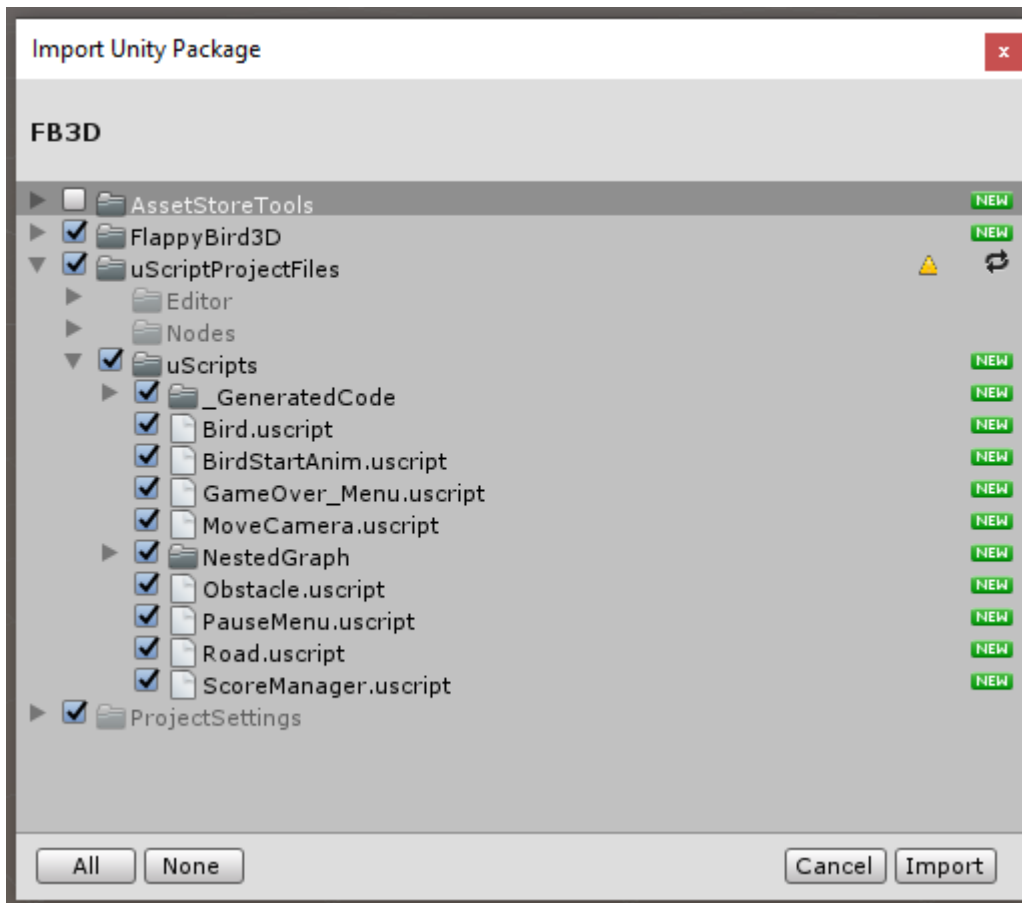

<https://assetstore.unity.com/packages/tools/visual-scripting/necronodicon-4497>

Just two commands (marked in the picture) or all (in case of errors you have to delete the problematic scripts (*.cs))

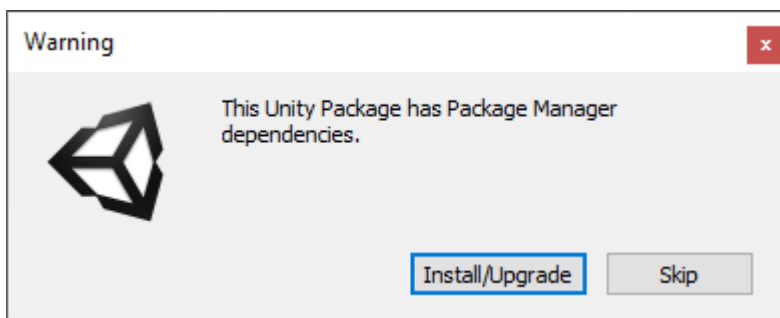

4. Import Flappy Bird 3D Full Game uScript

Import from the Unity Asset store

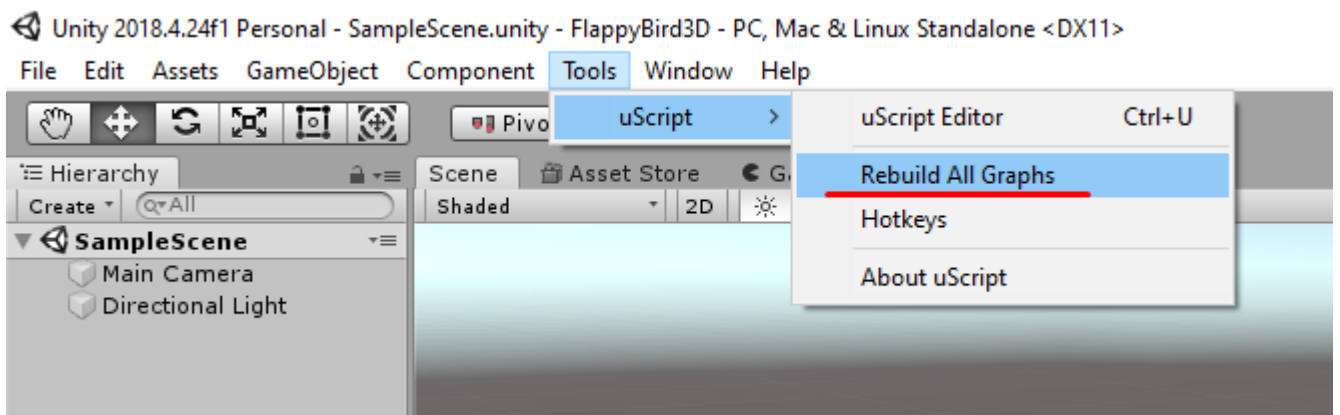

We import 3 catalogs as in the picture:

- FlappyBird3D
- uScriptProjectFiles
- ProjectSettings

Unity import Warning: This Unity Package has Package Manager dependencies. Choose the: **Install/Upgrade**

5. Rebuild All Graphs (Tools > uScript > **Rebuild All Graphs**)

5. Restart Unity
