

Alien Theme for uScript Professional

Alien Theme is an add-on that changes the look **uScript Visual Script** editor.

Alien Theme is save, it only change graphic files.

It can also be used for other versions of uScript (PLE and Basic)

Install:

1. If you have not yet imported **uScript Professional**, do it.

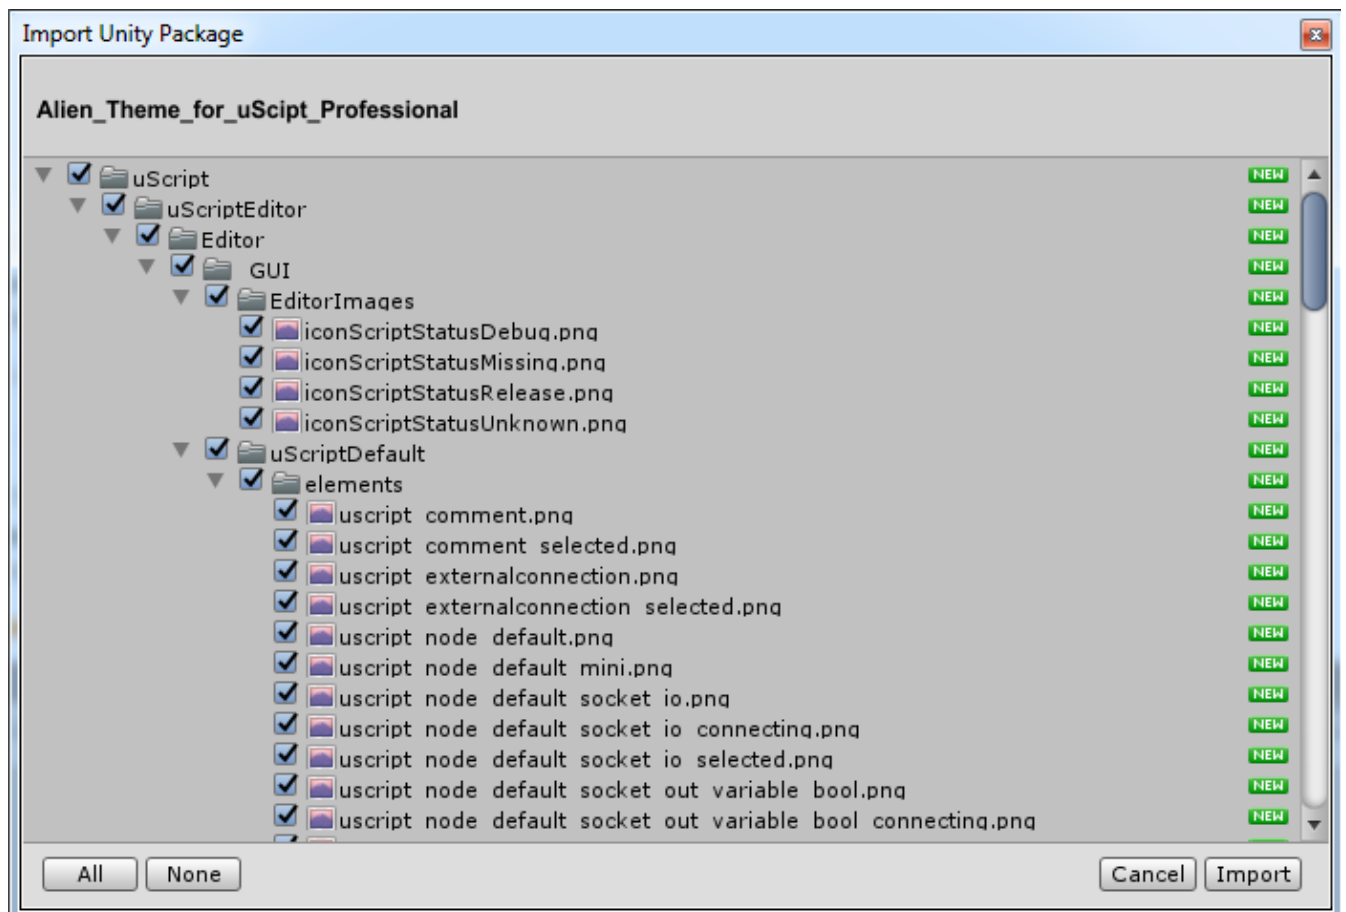

DETOX STUDIOS LLC
uScript Professional

★★★★☆ (254)

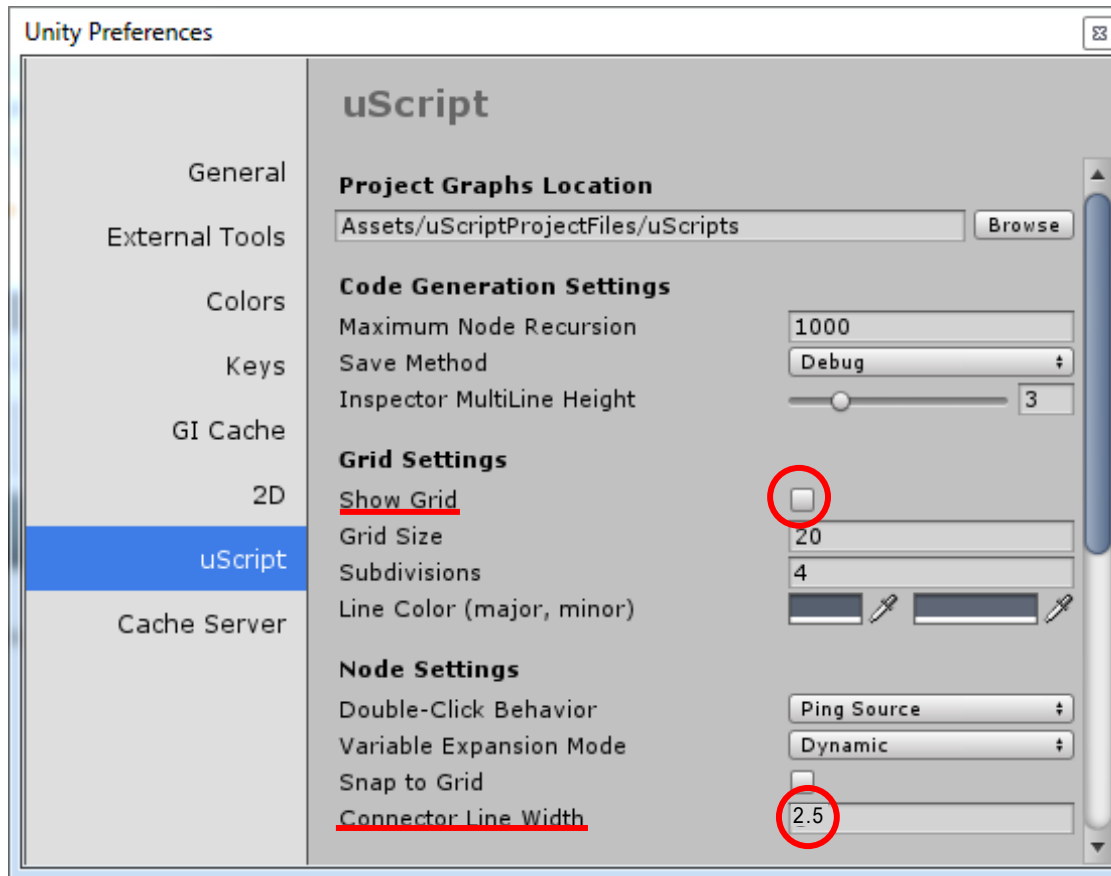

€58.07 €46.46

Import

2. Import **Alien Theme for uScript Professional**

3. In Unity Menu: **Edit -> Preferences.**

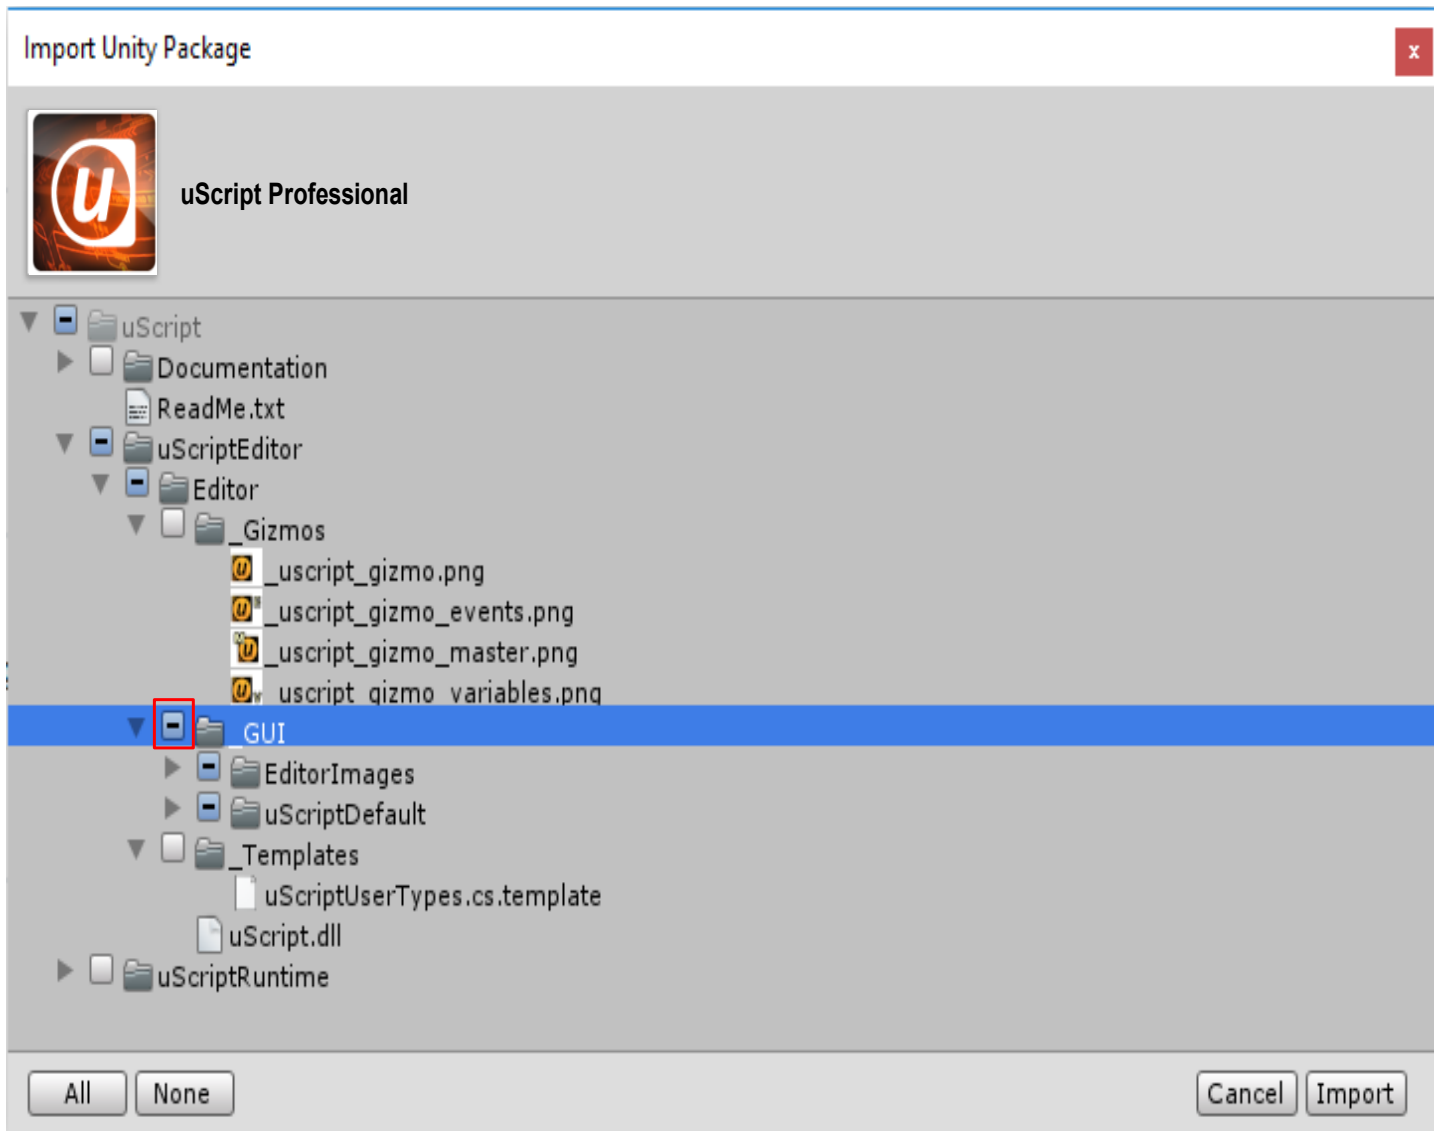

Change for uScript "**Connector Line Width**" to **2.5** and uncheck "**Show Grid**"

4. Restart the Unity program.

Uninstall:

Import all **uScript Professional** or only catalog: "**uScript / uScriptEditor / GUI**"

Install to other uScript versions

Just the same after point **2**. we need to move all files and catalogs from: "Assets / **uScript**" to:

- for **uScript Personal Learning Edition** → „Assets / **uScript_PLE**”
- for **uScript Basic** → „Assets / **uScript_Basic**”

Delete "Assets / **uScript**" catalog.
